

STOP WATER LEAKS

(AND SAVE MONEY)

Get FloLogic Intelligent Leak Control Monitors*

Prevent Water Damage with Non-Stop Leak Detection

Undetected water leaks can cause hundreds of thousands of dollars in damage to the day-to-day essentials your ministry relies on to advance the Kingdom. Walls, ceilings, floors, books, computers, musical instruments and audio equipment are susceptible to costly damage.

While repairing damages, there is a chance you could have to stop using your facilities for worship and other activities – and we want to help you prevent this from happening.

FloLogic® Stops Plumbing Leaks in Their Tracks

This commercial-grade leak control device is an intelligent yet simple-to-use system that:

- Is installed on your building's incoming water supply
- Monitors for leaks and temperatures 24/7
- Automatically shuts off the water supply in the event of leaks and low temperatures
- Sends an alert to your smartphone

 Save 20% by ordering online at FloLogic.com/BMIC and using discount code **BMIC-Logic20****.

 You can also call **1-877-356-5644**.

Note: Many insurance carriers are beginning to require water sensor installation in buildings that have had a water damage claim in the past.
